I.   SECTION TITLE HERE

Problem x.yz. Problem statement goes here.

Solution. Treat equations as part of complete sentences. For example, the Schrödinger equation can be written in the position representation as

$$i\hbar\partial_t\psi(x,t) = \hat{H}\psi(x,t) \tag{1}$$
$$= -\frac{\hbar^2}{2m}\nabla^2\psi(x,t) + V(x)\psi(x,t).$$
